

5 WAYS TO SAVE ON YOUR ENERGY BILL

1 SIDING

The siding you choose for your home has a huge impact on your energy bill. Insulated vinyl siding is one of the best types of siding you can use to properly insulate and protect your home.

INSULATED VINYL SIDING IS ONE OF THE BEST TYPES OF SIDING YOU CAN USE TO PROPERLY INSULATE AND PROTECT YOUR HOME.

2 WINDOWS

If you are going to save money on your energy bill, your windows must be sealed properly. Consider a high quality and energy efficient window to save the most amount of energy and money.

3 DOORS

Properly sealed and installed doors will allow you to keep your home warm in the winter and cool in the summer. Do not let your hard earned money escape here when it is easy to fix!

4 HEATING/COOLING

Switching to an energy efficient heating/cooling system is a must! Also, installing a programmable thermostat will provide better control over your home's temperature when you are not home and at night.

INSTALLING A PROGRAMMABLE THERMOSTAT WILL PROVIDE BETTER CONTROL OVER YOUR HOME'S TEMPERATURE WHEN YOU ARE NOT HOME

5 UNPLUG

Shut off and unplug any of your devices or appliances when you are not using them. Even when you think you have shut something off, such as a TV, there are sometimes "stand by" lights on. Unplugging these things when not using them will prevent any unnecessary energy drain and money loss.
